Internship Offer Letter

Student Name	: Anviksha Singh
Stream	: B.Tech
Branch	: B.Tech(Artificial Intelligence (AI) and Data Science)
Institute Name	: IILM University, Greater Noida
Internship Domain	: Google AI-ML
Internship Duration	: April 2026 - June 2026
AICTE Student ID	: STU67e7fb0f17fc21743256335

We are pleased to inform you that you have been selected for the 8-Week **AICTE – EduSkills Virtual Internship Program**.

During this internship, you will learn and demonstrate industry-relevant skills that will enhance your employability and strengthen your confidence in the subject area.

The program is designed to provide structured learning combined with practical exposure.

Internship Structure & Evaluation:

- The internship will follow a **week-wise structured learning plan**.
- You will be required to complete **weekly assessments** to track your progress and understanding.
- Certain modules will require submission of **project documentation and assignments**.
- In the final week, you must appear for a **Final Assessment Test**.
- The final grade will be based on your overall performance, including weekly assessments, project submissions, and the final test.

Upon successful completion of all required steps and assessments, you will be awarded a **Virtual Internship Certificate**.

Please note that this offer letter will be considered valid only after the successful completion of the internship program and fulfillment of all assessment requirements, including obtaining the final completion certificate. Without the final completion certificate, this offer letter shall not be treated as a valid document for any official purpose.

The week wise Structure of the Internship is as Follows:

Week	Module	Description
week 1	Program neural networks with TensorFlow	Everything you need to know to demystify machine learning, from first principles to creating convolutional neural networks for advanced image recognition and classification.
week 2	Get started with object detection	Basics of object detection and integrating pretrained object detectors into mobile apps.
week 3	Go further with object detection	Train custom object-detection models using TensorFlow Lite and Model Maker.
week 4	Get started with product image search	Build a product image search feature using on-device object detection.
week 5	Get started with product image search	Detect objects in static images and live camera feeds for visual product search.
week 6	Go further with product image search	Build backend integration for product image search mobile applications.
week 7	Go further with image classification	Build custom image-classification models and improve classification skills.
week 8	Go further with image classification	Create and integrate a custom image classifier model into your app.
Final Credential Validation / Internship Grade Point Assessment		

Note: There is no stipend associated with this internship.

We congratulate you on your selection and wish you a successful learning journey.
